-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 6-17 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 6 and 21 have multiple grammatical problems. For example, line 8 of claim 6 recites relations between attributes and nothing. There is no grammatical end to this relation. The term "transaction" is used many times and it is not clear if it is used consistently throughout the claim. Claim 21 mirrors the errors of claim 6.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical

Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 6-17 and 21-22, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Peckover.

Peckover shows intelligent agents for electronic commerce. Figure 1 shows a product query (with keywords) going to the agent system 10 (business information management system) via a network (receiving an initial set of attributes). The attributes are shown in figure 5b. The customer set is in the right column (also necessary conditions). Product recommendations are returned to the customer based on initial and customer sets of attributes (see the response to the customer in figure 1). Figure 5B shows correspondence between initial and customer set. Figure 9D shows that the attributes satisfy numerical laws. The consumer personal agent 12 (table manager/inspector) develops a consumer profile (correspondence table), which saves attributes used in previous transactions. When a new query is received, the personal agent 12 determines if there are new attributes and updates the consumer profile (revised set of attributes). The data in a new query is compared to the consumer profile based on the correspondence of the common attributes. The information of use in the consumer profile is extracted (cellular decomposition). This process is done repetitively for each customer query. Market 18 represents many shops. The consumer personal agent 12 and the decision agent 14 represent the second and third functional blocks in

claims 7 and 8. The preference manager function 54 (local information management block) in personal agent 12 maintains up-to-date information (resolve conflicting relations, see column 19, lines 29-31)

Response to Arguments

Applicant's arguments with respect to all claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Cuff whose telephone number is (571) 272-6778. The examiner can normally be reached on 8:00 to 5:30.
